1255 Corporate Center Dr., Suite #100
Monterey Park, California 91754

Date Proposal Received

7/14/2009

(ASSIGNED BY GREENBOOK COMMITTEE)

Subsection or plan to be revised: 201-1.1.6 and 303-8.1 **On page(s):** 55 & 336

Revision: *(Editorial Revision ONLY)*

~~201-1.1.6~~ 201-1.6 Pervious Concrete.

~~201-1.1.6.1~~ 201-1.6.1 General.
~~201-1.1.6.2~~ 201-1.6.2 Materials.
~~201-1.1.6.3~~ 201-1.6.3 Mix Design.

303-8.1 General. Pervious concrete shall conform to ~~201-1.1.6~~ 201-1.6. Pervious concrete shall be constructed a minimum of 6 inches (150mm) thick, unless otherwise specified in the Special Provisions or shown on the Plans.

Reason For Revision: The Pervious Concrete specification was entered into the 2009 edition of the Greenbook as **201-1.1.6**. This has presented some confusion to the readers of the Greenbook as the numbering system is in the center of the concrete materials discussion. Placing the Pervious Concrete specification at the end of **201.1** eliminates this confusion. The change to **303-8.1** refers to the proposed section instead of the previous confusing one.

Submitted By: Rod Elderton **Phone No:** (909) 392-5429
