1. Change No. 314SM – Section 200-1.4 Coarse aggregate for Portland Cement Concrete. Approved in General Committee.
2. Standard Plan change to 311 and 121 was discussed however we will request someone from the Standards Plan Committee to attend next meeting to discuss the changes made to 311 and 121. [David Mitchell explained the changes that were proposed in Std Plan 121.](#) Discussion included consideration to add a roll curb that is used for roundabouts. LACPW's will be contacted to submit any roll-curb for roundabouts to Standard Plans committee for consideration. There was also discussion to use a "w" for the width of the gutter to be considered similar to the B2-6 and B3-6 along with note 2.

### IV. New Business:

1. Change to wording of Section No. 302-4.10.2  
[Discussion was to either modify the language or add a comma.](#) Charles will contact [Bill Mahoney](#) about the next step to update the GB.

be determined by deducting the remaining weight of materials from the weight of materials delivered.

**302-4.10.2 Emulsion-Aggregate Slurry Seal Surfacing.** Emulsion-aggregate slurry seal surfacing will be measured by the combined weight of each ton (tonne) of emulsified asphalt and each ton (tonne) of each Type of aggregate used in the Work.

The basis of measurement shall be the combined weight of dry aggregate, **excluding mineral filler and emulsified asphalt**, in tons (tonnes), for each Type of aggregate used in the Work, as determined by licensed weighmaster's certificates. The weight of added water and set control agents used in the slurry seal mixture will not be included in the weight measured for payment. No deduction will be made for water in the aggregate and emulsified asphalt.

2. 318 UM - 206-7 Composite Materials -Underground Approved to Editorial Comments were submitted to ESS for review. Those comments were combined along with notes per discussion during the meeting. The notes and comments were sent to the Underground Committee on Aug. 30th.
