- 2) Erik Updyke and Randy MacFarlane began a discussion of construction inspector and project engineer training programs at LA County and the City of LA. There was overall consensus among committee members that rotating engineers into field positions builds knowledge quickly, and improves communication and prioritization skills, and increases the engineer's effectiveness. These improvements are largely attributed to interaction with seasoned inspectors and contractors. Agency training programs and policies that allow engineers to transfer into field positions were compared and contrasted. Many committee members joined the discussion.
- 3) The tentative schedule for the 2018 Greenbook is December 2017.
- 4) Omar Moheize started discussion of curb ramps, and many participated included Erik Updyke, Chris Kubasek, and Randy MacFarlane. The main take aways were: 1.) Standard Plan 111 is not guaranteed to be ADA compliant, 2.) ADA compliance is a moving target and requires site specific design to guarantee compliance.
