The original proposals that were distributed by email with the minutes were discussed. Tim explained the changes and history of the Sub-Task Force. Discussion ensued on the individual and combined gradations. Don will work on the wording for 201-1.3.2. The Group agreed that the mortar strength test is not necessary. If gradations are performed by CTM 202, then ASTM 117 is not needed. Further discussion will continue at the next meeting.

Javier presented Draft Number 11, following the format used for CLSM. The Group continued the discussion on varying aggregate proportions to meet target mix design; also discussed required strength, gradation, and where SCC would be used on public works projects.

C. High Early Strength Concrete –

Drew informed the Group that a Draft Specification would be ready for discussion at the next meeting.

4. New Business –

- A. Ken has information on CalTrans reorganization and various committees for those interested.
- B. The EPA / Fly Ash issue is in the agenda comment phase with public comments next.
