3. Approval of Minutes from April 14, 2020 meeting
4/14/2020 Motion to approve the meeting—motion—Tom Seconded...all in favor...passes.

4. Chair's Report on Main Committee Meeting

Revisions still in discussion, no contributions from main committee.

5. Task Force Report

A. Geosynthetics Task Force (Vinh Tran): Revision out for review.

- i Get any comments from the review package to Sabah preferably by June 15th for compilation.
- ii Next meeting will be held on June 3rd at 9:30 am via GOTOMEETING.

B. Asphalt Task Force (Tom Williams): T: Met May 6th active working on 299 sits with surface will be discussed June 16th, updates will be provided by Surface. Submitted changes for 299SM super pave effort, waiting for info, changes 300 and 301...original draft changes and comments were made, revisions will be discussed June 3rd via GOTOMEETING, once those are cleared, will be pushed to surfaces.

- i New items: designate a burn mix in green book D2. Discussion of use of ARHM, CIR revisions in works. 299 should have been submitted, but looks like it is in limbo, a simple change but not attached to this meeting. Bring it up with geosynthetic task force next month.

C. Concrete Ad Hoc (Nathan Forrest). Edward: Section 201 regard to concrete, comments by Eric discussed and evaluated, more evaluation necessary.

- i New item assisting ability, evaluation/ consideration of agencies providing declarations for concrete mixes.
- ii 246 SM - ASR Testing: This change was pretty much complete but when we took one last look at it prior to transmitting, it was recognized that the ASTM standards for Fly Ash have recently changed and, as a result, this spec may also need to change. We've discussed it at our last 2 meetings, but the turnout was low last week so we didn't make progress on the technical aspects of it (we lacked the expertise at the meeting.)
- iii 270 SM – Shrinkage Compensating Cement: Keegan's log shows this as being complete and sent to the New Materials and Methods - Surface Subcommittee back in January of 2017 but the log shows no further progress after that. Are there any updates as to what happened or what is happening with that?
- iv 272 SM – Rip Rap: We show this item as complete at the Ad Hoc committee and in-process at the main committee as of February. Perhaps there is an update on this on also?
- v 285 SM – Permeable Aggregate Gradations: This is complete at the Ad Hoc committee and I believe it got dropped in the transition between Durand and I. Please find the change and transmittal attached.
- vi 286 SM – Concrete for Special Exposure: I believe we've reached agreement on the language for the change. We'll have another reading of

the final version next month and then ballot before transmitting to the New Materials and Methods - Surface Subcommittee.

vii 304 SM – Reorganizing Section 201: This is an ongoing item; we continue to work through the section each month making updates and improvements.

6. Changes

- A. Change 285 section 200 Permeable Aggregate Gradations (Concrete Ad Hoc):
Status: No status updates
- B. Change 286SM Supplemental Cementitious Materials (Concrete Ad Hoc):
Status: still with Concrete Ad Hoc...still in discussion
- C. Change 246SM Reactivity Testing (Concrete Ad Hoc):
Status: Still with group.
- D. Change 299SM (Asphalt Task Force):
Status: Re-submitted
- E. Change 300SM (Asphalt Task Force):
Status: Still with group
- F. Change 301SM (Asphalt Task Force):
Status: Still with group

7. Old Business: No

8. New Business: None

9. General Discussion: Re-instating the Green Task Force for Greenbook...re-using materials, sustainability, recycling, etc.

i Surface chair to bring to Greenbook Main Committee.
