Meeting Minutes Sept and October –

Motion: JL motion to pass

Second: CM second,

No objection all passed

II: Announcements:

GN: Announcements: GB committee met in first of NOV to get things from the rest of the sub committees, etc. and we would have a lot to fill the new GB, a lot of the specs are not done, KF has been a one-man army to get things done,

Out of this group we wanted to get things done and things right, so they do not have to be done

BNi has put hard deadline on stuff to get it in and done, then others say if we do not have till spring 2021, we will drag out,

But priority 1 is to get it done, and we want to convince BN: I to get print in Spring rather than DEC 2020 for the Greenbook

Let's wait until Thursday to see if we can have or need a DEC 2020 meeting

III. Old Business:

GN to DF we took your document and slipped it into the spec, what DF did was just word smith it

DF please give us an overview – no significant change, just cleaned up the verbiage of the document. KF has some issues to make sure we followed they GB style guide, and we have done that.

DF, we do not want to reflect unused or obsolete information in the 2021 Greenbook all new language is yellow and highlighted, the old is grey and has strike thru

No language is changed unless it was for the style guide – not too many changes, but there were a few of them, we met on 14 NOV and submitted them to Gean –

GN I will send these to KF to move these along –

GN to KF, I told him we needed to have our work almost done before we moved things on to Editorial, we cannot just allow or let KF do our work for us, we need to do more for Editorial

GN to DB, I received your part 7 today – please go thru this for the group for us

DB on part 7 GN KF and I went thru this document and KF gave us a new numbering system, this has all been numbered now correctly,

The is for the solid wall HDPE what I have added are in Blue and underlined,

The old is in red and has strike thru,

Quality people reviewed and went thru this spec for us. WE have had a lot so comments to clarified items and to get this up today information.

They make water storm and sewer HDPE

I thought this would be simpler, however it was not so from the comments I have added the sectional slip lining section,

I am making a new section for solid wall HDPE liners we arranged, and the HDPE is together, and the PVC is together,

GN 500-7.4 there was some last-minute changes,

DB has some last-minute changes to do yet.

GN updated section on a 30-day hold - DB hopes to wrap up this week LOL

Vote for section 500-7.4 to thirty day hold motion to hold DB second: JL GN

Objections no

GN questions on plastic liners or part 5

GN schedule - we will know more of the schedule on Thursday.

DEC meeting would be a working meeting, I will follow up with you after the Thursday meeting.

GN the Style Guide - who does not have it or not seen it AR, DW, TL, LC

GN will send out the Style guide to everyone in the meeting - review of the style guide as a group.

This will help us streamline things for us

DB I have two sections, solid wall HDPE and the fold and form PVC, I have all info, and I will do one then the other.

GN I will be available to help you with this,

DF attend the committee meeting.

DB: update on Curt - he is peppier – and learning to re walk, and that he fell and was in the hospital with sepsis, he is in rehab his wife can visit, and he see her, he has therapists who walk with him he can do about a half step at a time,

Good strong guy so he will recover, he will be good, he sounds good and is sharp.

GN he wants to come back to the GB – a lady had called him about a pvc and a joining method, certain T'd has been sold using it for new buried construction

GN: we need to get this all done for the 2021 edition, everyone here can submit a change or an update to GB,

DB: we have more things on our plates to get done, we do not need more new things, we need to get this done LOL

Thanks, and adjourned 11:34AM

Jamie Lienberger

Secretary – Greenbook
