Donna Won (DW)	L.A. County San. District	(562) 908-4288 x1628	dwon@lacsd.org

Meeting minutes of August 19, 2014 were approved.

II. Announcements:

- A. Refer to the General Meeting Minutes posted on the GB website, www.greenbookspecs.org. Correspondence item f. was corrected for the term “thickness” which is changed to “stiffness”.

III. Old Business:

- A. Change 223NU (including Change 242NU, Pressure Pipeline for Water) - Section 306 Reorganization: After a brief discussion to delete the ASTM designations for bedding of plastic and concrete pipe in favor of SSPWC requirements, and JC agreeing to send revisions for when feeler gauge measurement is required, DP had a few last minute edits to forward to Erik Updyke for Editorial Standards review.
- B. Part 5 – Editorial Changes: Work on this change will continue at the October 2014 meeting.
- C. Change 266NU Polypropylene Pipe: MMo brought the latest version of subsection 207-25 with references to Type S “dual wall” and Type D “triple wall” removed from the heading and materials requirements. Comments were made to replace several occurrences of the word “polyethylene” with “polypropylene”. The 60-inch diameter pipe size will be removed from Table 207-25.3(A), and brought as a later change to include the minimum cover and bedding requirements. MMo will review ASTM and AASHTO requirements to see if long-term performance testing (cracking) is already addressed or will need to be added to this change.

IV. New Business:

None.

V. Adjourned: 12:25 p.m.

VI. Next meeting: October 14, 2014 at 11:00 a.m.

Roger Kohlenberger, Secretary
Los Angeles County Department of Public Works
(626) 458-4964
