Approval of meeting minutes of October 14, 2014 was deferred to January 2015.

II. Announcements:

A. Refer to the General Meeting Minutes posted on the GB website, www.greenbookspecs.org.

B. JQ announced that "Reline America" has a polyester resin and a vinyl-ester resin for use with UV-cured liners which have both passed the City of Los Angeles' chemical resistance ("Pickle-Jar") test.

III. Old Business:

A. Change 223NU (including Change 242NU, Pressure Pipeline for Water) – Change was approved by the Main Committee in October.

B. Change 266NU Polypropylene Pipe: Discussion continued with regard to thickness and stiffness requirements. It appears the differences between ASTM and AASHTO are small. Nevertheless, MMo will expand the table of wall thickness and stiffness values, for the benefit of Agency inspection staff, to reflect the minimum required values from each standard. DBe commented that the values will need to be reviewed and updated with subsequent releases of the SSPWC. MMo will edit this Change once again, replacing "or" with "and" as appropriate to ensure the more stringent requirements of ASTM and AASHTO are being met, and bring it for further discussion at the next meeting.

C. Part 5 – Editorial Changes: DB and Erik Updyke (Main Committee Co-Chair) have been cleaning up existing conflicts and ambiguities for inclusion with the 2015 Edition of the SSPWC. Further work on the "cleaned up" version will begin again in January 2015 to address other major structure and format issues.

IV. New Business:

None.

V. Adjourned: 12:27 p.m.

VI. Next meeting: January 13, 2015 at 11:00 a.m.
