Russell Tripp (RT)	CA Precast Conc. Pipe Assoc.	(951) 220-7062	rtripp@concrete-pipe.org

II. Old Business:

- A. Change 266NU Polypropylene Pipe: This change was approved with minor edits at the February NM&M - Underground meeting, and has been forwarded to Editorial Standards for review.
- B. Part 5 – Editorial Changes: DB has collected supplemental additions and amendments to the SSPWC from various public agencies, and is in the process of compiling pipe lining materials and processes into a revised Part 5 (revisions proposed to the 2015 Edition of the SSPWC). The Chemical Resistance Test results will become more critical for sewer applications, while additional thickness to protect against erosion will be needed for debris carrying storm drain applications.

III. New Business:

CG handed out copies of a draft SECTION 307 – JACKING AND TUNNELING for review, and asked that it be reviewed. Any comments will be addressed at the April 2015 NM&M – Underground meeting.

IV. Adjourned: 11:55 a.m.

VI. Next meeting: April 14, 2015 at 11:00 a.m.

Roger Kohlenberger, Secretary
Los Angeles County Department of Public Works
(626) 458-4964
